

Private Internet Access Agreement

User Security Operating Procedures (SyOps)

All users of SoldierNET must read and sign these SyOps and comply with them at all times.

1. Use of SoldierNET is limited to personal use only and **it is not permitted** to use it to carry out official business.
2. You must **never** attempt to connect any official MOD equipment to this private network.
3. You must **never** attempt to connect your personal IT equipment to any official MOD system.
4. Security on the Internet is inherently weak and any data that you transmit, either by email or whilst browsing the web, will be transmitted in a form that could potentially be picked up and viewed by others. You should bear this in mind when deciding whether to transmit private information such as bank details.
5. You are strongly advised to protect your PC from virus attack by installation of an appropriate anti virus package, anti-spam product and firewall software and to ensure that they are updated regularly.
6. Neither Incito Ltd, nor the MOD accept responsibility for any losses resulting from the use of this system.

I hereby confirm that I have read and understood the above guidance and I agree to abide with it at all times.
